TIER LUXURY SPC INDOOR FLOORING

FLOOR BOARDS *to love and live on*

TIER Element luxury flooring provides the beauty of wood with advanced digital print technology and EIR surface embossing in a thicker, more durable Stone Polymer Composite (SPC) profile which is heat and water resistant, highly stable, VOC free, and offers sound suppression and an easy click installation system.

BENEFITS

NATURAL AESTHETIC

Photorealistic timber scans for natural wood look

MINIMAL REPEAT PATTERN

Up to 20 m² of no repeat woodgrain pattern

SOUND SUPPRESSION

Specialised underlay for quieter spaces

WATER RESISTANT

Surface resistance to water ingress

CLICK INSTALLATION

Precision engineering for smarter, more streamlined installation

HEAT RESISTANT

Reliable performance even in direct sunlight

STABLE

SPC product make-up provides board stability

VOC FREE

Cleaner, safer, more eco-friendly flooring

APPLICATIONS

TIER Element indoor flooring is designed for versatility as well as durability. TIER Element can be applied to any room in your residential or commercial space. Let the low-maintenance and high-performance features of the TIER Element range enhance the look and functionality of your home or business.

COLOURS & STYLES

TIER flooring is designed to be beautiful and functional. TIER is available in a wide range of natural colours and tones that embody the look of wooden flooring, without the maintenance hassle or environmental impact. Engineered to last and tastefully designed, TIER will enhance the look and functionality of your space. Choose from our range of colour options to make your floors a standout feature.

White Ash

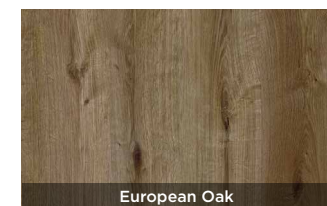

Danish Oak

Golden Hickory

Honey Oak

European Oak

NOTE: Due to printing and/or screen variations, colours in this brochure may differ from the actual products.

LUXURY SPC INDOOR FLOORING

With CarbideCore technology

TIER Element flooring offers cutting-edge EIR embossing with advanced digital photorealistic print technology in a 6.5 mm profile, giving your floor a more natural look and embossing that mirrors the timber grain and pattern. Anti-slip and UV protection provide greater longevity, safety, and style.

WEAR COATING & PRINT LAYER

UV, scratch, and slip resistant photorealistic print technology

CARBIDECORE

Manufactured with solar energy

SOFT INSULATING FOAM

Reduces noise and allows for a softer underfoot feeling

TIERS OF TIER ELEMENT

Wear Coating & Print Layer

TIER Element boards have an EIR embossed surface with advanced digital print technology for a more realistic look and texture with up to 20 m² of no repeat patterns which makes for a more natural looking SPC flooring.

Rigid SPC CarbideCore

The CarbideCore of TIER Element flooring is a mixture of powdered minerals and vinyl resulting in a very rigid board. Using a pre-mixing technique before extruding the core of the profile enhances the aggregate dispersion of the SPC allowing for improved board flexibility.

Soft Foam IXPE Underlay

TIER Element includes an IXPE underlay which gives you the benefits of improved sound insulation for a quieter indoors, better thermal insulation, and a softer feeling underfoot for a more comfortable space.

TECHNICAL INFORMATION

TIER Element is a 6.5 mm profile comprised of a 5.35 mm CarbideCore with a 0.15 mm wear coating and print layer. This is combined with a 1 mm IXPE underlay. With an AC4 wear rating, this product is suitable for use in both residential and commercial applications.

6.5 MM PROFILE

2G CLICK SYSTEM

This type of click system involves angling flooring panels to engage the locking mechanism. This results in sturdy and dependable horizontal locking, preventing gaps between planks, as well as vertical locking which ensures no unwanted height differences across the floor.
